Compared to other Oxford admissions tutoring services, what do I do BETTER?

"Recording the interview and feedback notes were helpful." - Sophia

"Mirrored the real interview very very well. **The content was engaging and had quality which truly helped me to improve my critical thinking and problem-solving skills.**" - Kean

"**The sessions were very specific to my needs, so every lesson was very efficient in helping me improve in a short amount of time. Lots of good constructive feedback was provided. You gave me a real sense of the Oxford interview process, my actual interview wasn't much different to the mock interview we had. I had a few mock interviews with other tutors and they barely even put in the effort to look at my personal statement and make the questions a little bit more specific to me**". - Kati

"**Very relevant content to the interviews, more complex than school/better link between biology and chemistry than what is taught in school, covered my knowledge gaps swiftly and efficiently,** very concise notes that taught me the details as well as key principles, very engaging teaching style." - Claire

"**I enjoyed discussing new content I hadn't and would never have discussed in the classroom.** Feedback from the session was useful and efficient." - Naige

"**You were very quick to respond,** I called you up a couple days before my interview, and we were able to sort out a time for a meeting quickly." - Oscar

"The written feedback from each session is very useful (sic)" - Ayaan and Eleanor

"**Compared to other services, I think your feedback on the session was more expansive,** as well as going multiple questions on various topics" - Sergei

"**You always allow me to ask all my questions which really clears up any confusion I have in mind.** The mock interviews were very useful in helping me identify the bio/chem content where I lacked a solid foundation. **Also thank you so much for the very interesting further reading on telomere!**" - Cindy

"I found the detailed notes I got out of the session very helpful, I didn't receive notes from any other services." - Amelie
